Electronics

A McGraw-Hill Publication
330 West 42nd Street, New York, N.Y. 10036

Dear Subscriber:

You will receive -- free and postpaid -- the 224-page

"ELECTRONICS CASEBOOK OF CIRCUIT DESIGN"

if you renew your subscription to Electronics within the next 15 days.

This valuable time-saving reference data book (the equivalent of 700-text-book-sized pages) gives you complete on-the-job technical reference material.

You will appreciate the more than 350 schematics, nomographs, tables, charts and pictures covering, for example:

DESIGNER'S CASEBOOK: Breadboarding IC Systems With Color-Coded Modules
...IC Amplifier Provides Variable Reference Voltage...Integrated Circuits Quickly Assembled...Tunnel-Diode Pulser Measures Cable Delay.

CIRCUIT DESIGN: Powerful Logic From Power-Less Circuits...Using Transistor Circuits To Multiply And Divide...Ringing Choke Simplifies D-C To D-C Conversion...Topology Cuts Design Drudgery.

SOLID STATE: Improving The Performance Of Multipurpose IC's With Feedback...Off-The-Shelf Integrated Circuits For Versatile And Accurate Timer.

INSTRUMENTATION: Six Clues To Nanovolt Signals...Correlation Entering New Field With Real-Time Signal Analysis...Low-Frequency Noise Predicts When A Transistor Will Fail.

REFERENCE SHEETS: Nomograph Simplifies Design Of F-M/F-M Telemetry Systems...Nomographs Calculate Values For Twin-T Notch Filter...Nomograph Finds Output Voltage Error.

The Casebook (never sold separately) is our gift to you. It is our way of saying "Thank you" for renewing your Electronics subscription within the next 15 days.

The supply of the new Casebook is, of course, limited. So act now, today, and be sure of getting your free copy of "Electronics Casebook of Circuit Design" by returning the enclosed renewal form promptly.

Cordially,

A. A. Milbury
